Dear Hiring Manager,

I am writing to express my strong interest in the Junior Data Analyst position at Brightwave Logistics, as advertised on your careers page on September 12, 2026. With a Bachelor of Science in Statistics from the University of Leeds and hands-on experience in data analysis, I am confident that my skills and passion for data-driven decision-making make me an ideal candidate for this role.

During my six-month internship at Northfield Retail, I had the opportunity to work closely with the supply chain team to analyze inventory data across 48 stores. By leveraging Python and SQL, I developed an automated reporting dashboard that reduced weekly reporting time by 70%. Furthermore, my analysis of seasonal demand patterns helped the team reduce overstock by 12%, resulting in estimated savings of GBP 85,000 per year. This experience not only strengthened my technical abilities but also taught me the importance of translating complex data into actionable insights for non-technical stakeholders.

In addition to my professional experience, I have consistently sought opportunities to expand my skill set. I completed the Google Data Analytics Professional Certificate in 2025 and have built several personal projects, including a machine learning model that predicts delivery delays with 84% accuracy. These experiences have equipped me with a solid foundation in data cleaning, visualization, and statistical modeling.

I am particularly drawn to Brightwave Logistics because of your commitment to innovation and sustainability in the logistics industry. Your recent initiative to optimize delivery routes using real-time data aligns perfectly with my interests and career goals. I am excited about the opportunity to contribute to a forward-thinking team and to grow alongside an organization that values continuous improvement.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and experience can contribute to the continued success of Brightwave Logistics. I look forward to hearing from you.

Sincerely,
Priya Raman
